

RESTORE SIGHT · SHARE VISION

U.S. & Ethiopian doctors and Vision Care staff discuss plans for the new virtual PTC.

## Vision Care in The New Normal

---

*Dear Friends and Supporters of Vision Care USA,*

We wish everyone health and safety as we collectively experience the ‘New Normal’ due to COVID-19. Thanks to your support and prayers, Vision Care has been able to continue our mission to ‘Restore Sight, Share Vision’ across the globe, working closely with our overseas branches and partner hospitals to face the new challenges head-on.

This year, in lieu of our in-person surgical training program for local doctors, Vision Care USA will officially launch a virtual **Phacoemulsification Training Course (PTC)**, a months-long interactive surgical training course offered to selected ophthalmologists in Ethiopia, Tanzania and Uganda. And four trainee ophthalmologists in Ethiopia have recently been selected to complete this new virtual PTC program which will begin in September.

In addition, Vision Care USA will also be providing a general Refresher Course to Ophthalmologists who have previously completed the PTC with Vision Care.

We want to sincerely thank our Vision Care doctors and our supporters who have made this initiative possible. And while our Eye Camps are temporarily suspended due

to the pandemic, we strive to continue our mission and hope that the day will soon come when we can meet again in person.

Thank you for your continued commitment and support to Vision Care USA.

Sincerely,

*Vision Care USA*
